

NOT - a telescope for the future

Contribution ID: 52

Type: **Invited Talk**

ALFOSC at the NOT: a succesful loan

Thursday, 9 June 2022 09:30 (25 minutes)

The Alhambra Faint Object Spectrograph and Camera, ALFOSC, is provided by the Instituto de Astrofísica de Andalucía (IAA) under a joint agreement with the University of Copenhagen and NOT. With a field of view of 6.4×6.4 arcminutes in imaging mode, it can also be used for low/medium resolution spectroscopy, and polarimetry. In this talk I will present a selection of scientific results to which ALFOSC has contributed in the last years, and that demonstrate the success of the combination of instrument and telescope.
